

A CRM Application to Manage the Services offered by an Institution

BY

Vijaya Prasanna Makkena

mvijayaprasanna@gmail.com

Project Abstract

EduConsultPro Institute is a leading educational institution offering a variety of courses and programs in diverse fields. With a growing number of prospective students seeking admission each year, the institute faces challenges in managing the admission process, student enquiries, and expert consulting services efficiently. To address these challenges, EduConsultPro Institute decides to leverage Salesforce CRM to streamline the admission process and enhance the overall experience for both students and admissions staff. The use case focuses on the admission process for prospective students interested in enrolling in courses and programs offered by EduConsultPro Institute. The goal is to provide a seamless and transparent experience for students while enabling admissions staff to review efficiently and process admission applications, student enquiries, and case management.

Create Relationship among the objects

1. Create a lookup between appointment and student, appointment and consultant.
2. Create an object to store the information student and course details with the name Registration.
3. Also create a lookup between student and case to store the student queries for immigration or visa application.
4. The data model should be similar to the below Data Model with fields & relationships
5. Create tabs for the respective object.

tips:

Configure the Case Object

1. Go to the object manager,edit the case object.
2. Select the “Type”field and add the valuesin it.
Immigration
Visa Application
3. Now Select the “Status” field and add the values in it.

Create a Lightning App

1. Goto Setup, search for the App Manager in quick find
2. Click on New Lightning App
3. Give app name as "EduConsultPro", click Next, Next, Next
4. Add Home, Students, Courses, Consultants, Appointments, Registrations, and

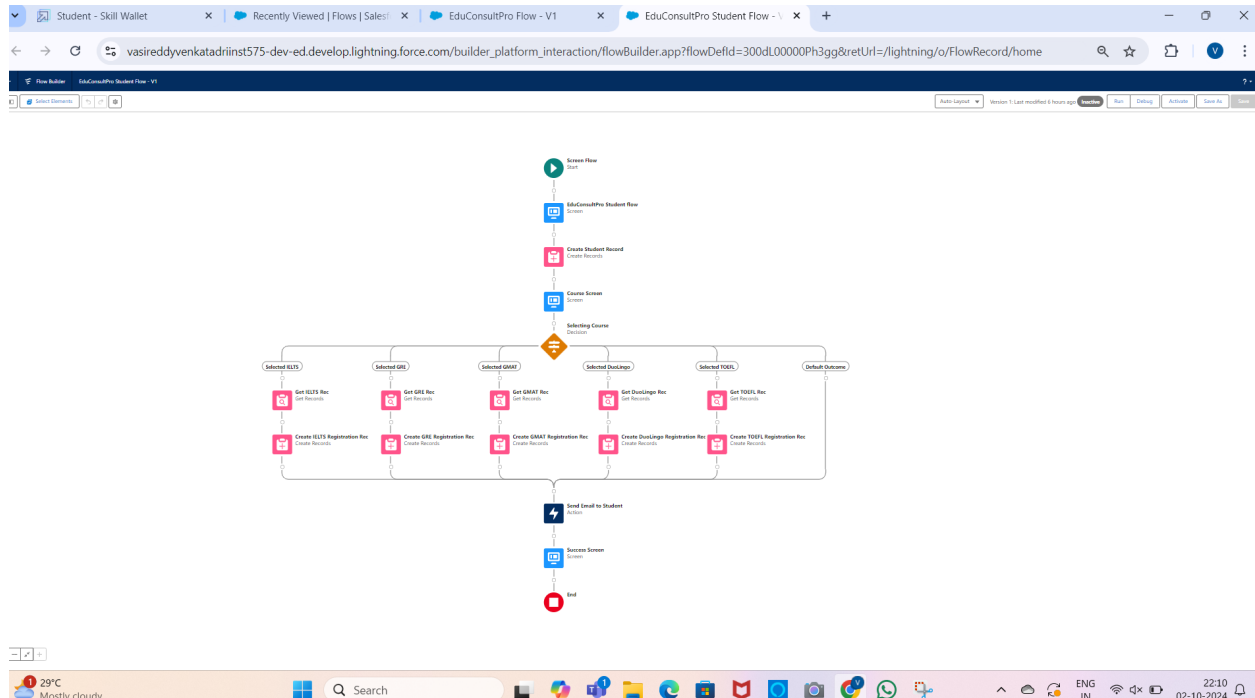

Cases from the Available Items to Selected Items.

5. Add the "System Administrator" profile from Available Profiles to Selected Profiles, click Save & Finish.

Task 2:

Create a ScreenFlow for Student Admission Application process.

Task 3:

Create Users

Create a user with a Standard platformuser profile.

User

1. Go to Setup -->Administration --> Users --> New User
2. LastName : Consultant
3. License : Salesforce Platform
4. Profile : Standard PlatformUser
5. Fill all the mandatory fields& Save.

Configure the User Settings

1. Go to Setup -->Administration --> Users --> click Edit next to your name
2. Scroll down to the bottom, under Approver Settings, Select "Consultant" the Manager Field.
3. ClickSave.

Approver Settings

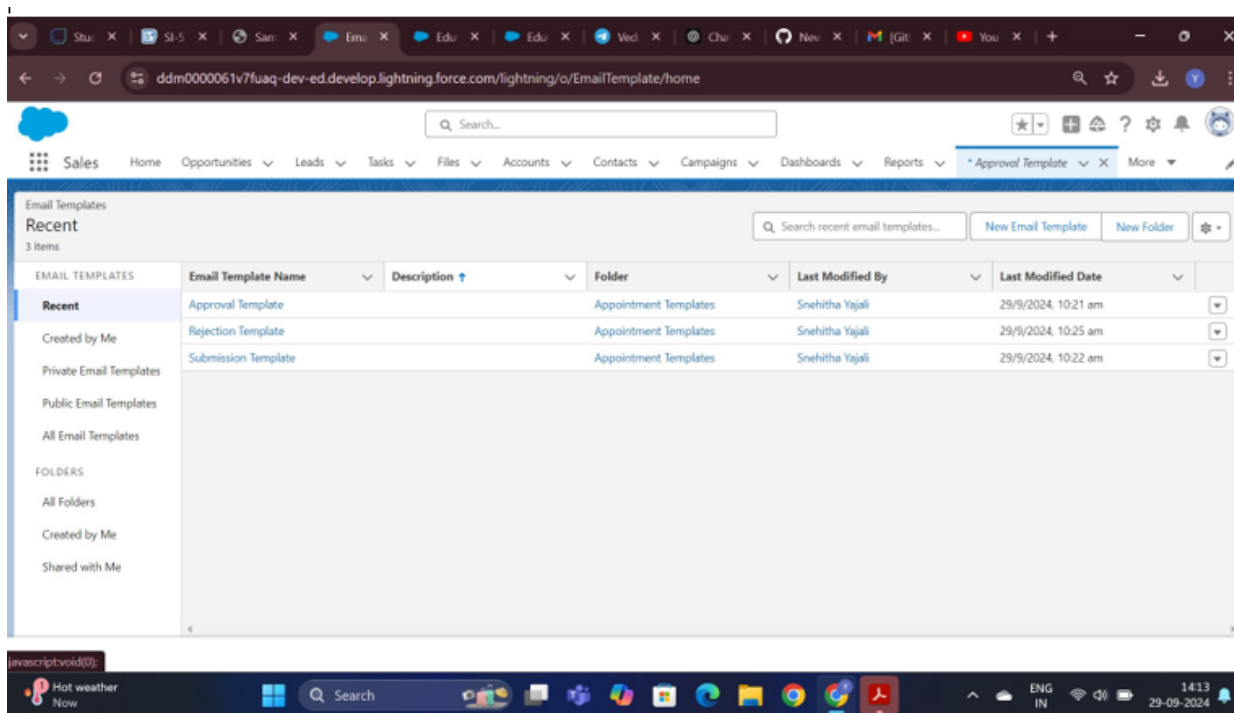

Designated Approver: 

Manager: 

Receive Approval Request Emails: 

Task 4:

Create an Approval Process for Property Object

The screenshot shows the Salesforce Lightning interface for managing email templates. The browser address bar displays the URL: `ddm0000061v7fuaq-dev-ed.develop.lightning.force.com/lightning/o/EmailTemplate/home`. The navigation bar includes tabs for Sales, Home, Opportunities, Leads, Tasks, Files, Accounts, Contacts, Campaigns, Dashboards, Reports, and an active tab for Approval Template. The main content area is titled "Email Templates" and shows a "Recent" list of 3 items. The list includes an "Approval Template" and two others, "Rejection Template" and "Submission Template", all created by "Snehitha Yajali" on 29/9/2024. The interface also shows a sidebar for "FOLDERS" and a bottom status bar with system information.

EMAIL TEMPLATES	Email Template Name	Description	Folder	Last Modified By	Last Modified Date
Recent	Approval Template		Appointment Templates	Snehitha Yajali	29/9/2024, 10:21 am
Created by Me	Rejection Template		Appointment Templates	Snehitha Yajali	29/9/2024, 10:25 am
Private Email Templates	Submission Template		Appointment Templates	Snehitha Yajali	29/9/2024, 10:22 am

Task 5:

Create a Record Triggered Flow

Configure the Start Element

1. From Setup, enter Flows in the Quick Find box, then select Flows.
2. Click New Flow.
3. Select Record-Triggered Flow.
4. Click Create. The Configure Start window opens.
5. For Object, select Appointment.
6. For Trigger the Flow When, select A record is created.

Add an Action Element

1. Add an Action element after the Start Element and Select the Submit for approval action, label it as "Approval SubFlow".
2. Set the RecordId to "{!\$Record.Id}".

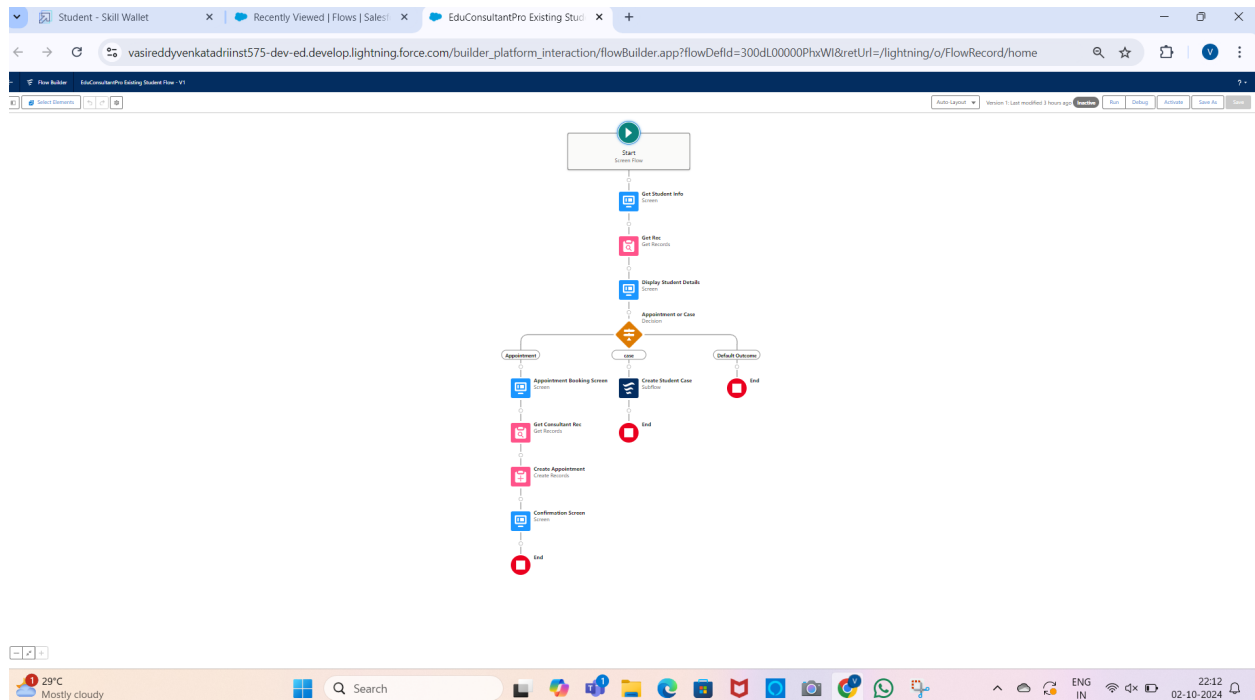

The screenshot displays the Salesforce Flow Builder interface for a Record-Triggered Flow. The top navigation bar shows the flow name "EduConsultPro Approval Flow - V1" and various action buttons like "Run", "Debug", "View Tests", "Deactivate", "Save As", and "Save". The main canvas shows the flow diagram with the following elements:

- Start** (Record-Triggered Flow): Object: **Appointment**, Trigger: **A record is created**, Optimize for: **Actions and Related Records**. It includes links for "Edit", "Add Scheduled Paths (Optional)", and "Open Flow Trigger Explorer for Appointment".
- Run Immediately** (Connector): A small circle connector.
- Approval SubFlow** (Action): A lightning bolt icon representing an action.
- End** (Terminator): A red square icon.

The bottom of the image shows the Windows taskbar with the date and time as 22:15 on 02-10-2024.

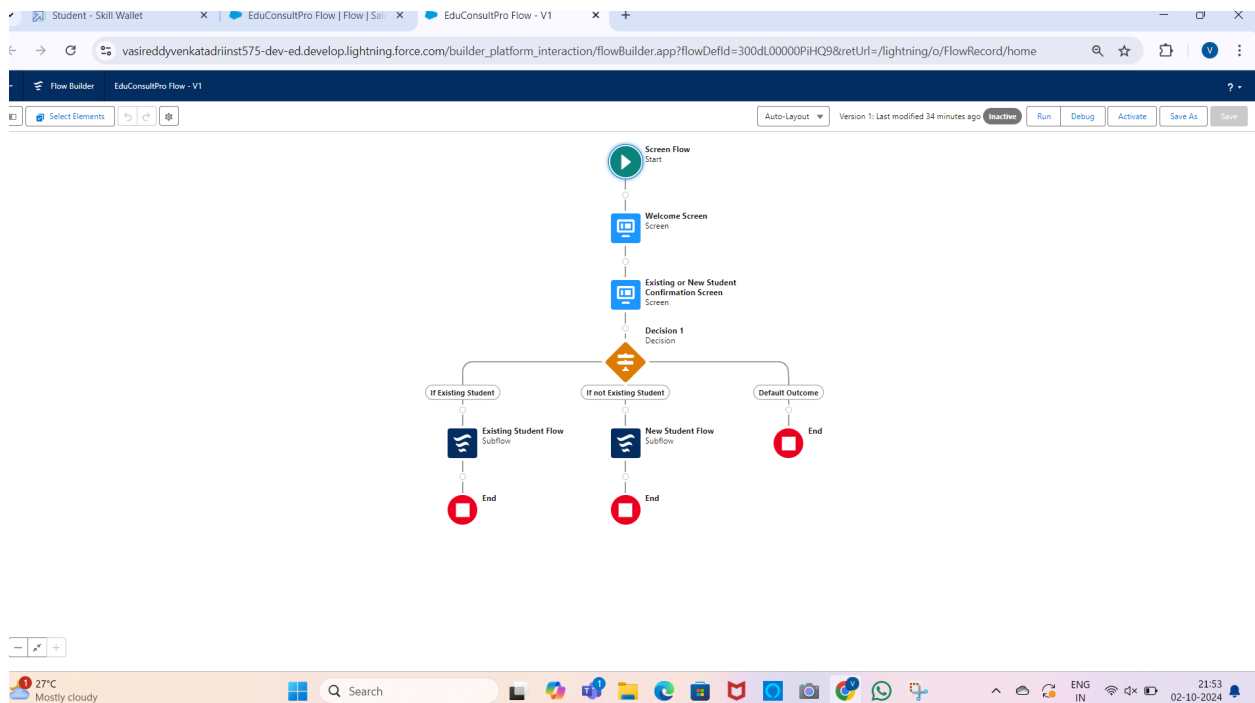

Task 6:

Create a ScreenFlow for Existing Student to Book an Appointment

Task 7:

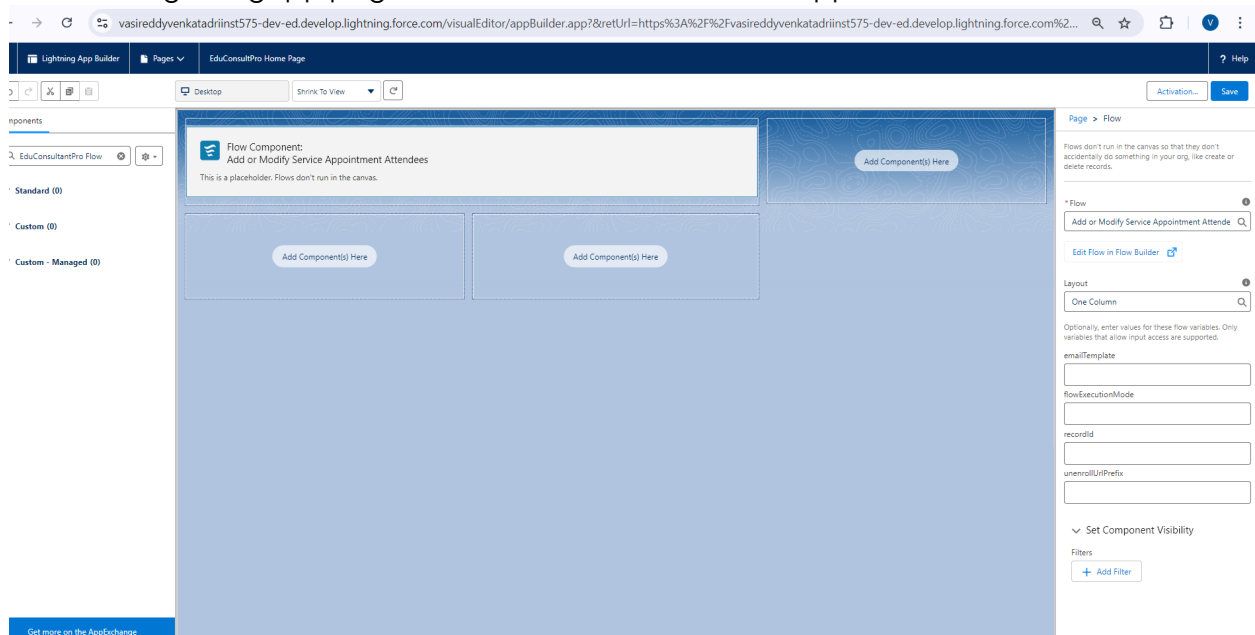

Create a ScreenFlow to Combine all the flows at one place

Task 8:

Create a lightning app page

Create a lightningapp page and make it available at the application

THANK YOU
